PT comments EPA ann 6 19 20 KT formatting.docx

Here is my first pass at making it pretty. Comments 103-107 seem to be a different format and I don't know what to do with them. There is also a table at the end that goes with C55 but I am not sure how to put it in the table.

Let me know what you think.

-Kate

Hi Kate, hope you are well!

I was wondering if we could seek your help in “making something look pretty!” Attached is a table of comments that Powertech had sent us in table form. Because I went in afterward and added our annotations to that original Powertech table, I think I messed up the formatting on some of these pages significantly. I was wondering if you could help us with this.

For example, on p. 25-26, the right margins are way off the page and also on subsequent pages before and afterward—similarly, the margins are off the page because I tried to add columns...

Also, somehow I managed to delete the row descriptor that appears on p.2 but not on p.1 at the top of the tables.

I've struggled trying to fix this but figured you could help us with this way more quickly than me.

I imagine your workload is heavy right now so this is not a huge rush. I think under current timelines, we are looking to issue the permits at the end of October. We're hoping to include this table as an attachment to our response to comment.

Please let us know if this is something you can help us with and if you have time. I can send an invite to further explain the chart if that would be helpful.

Thank you so much!
